

1. Lay sheets out, edges touching. Connect the edges with a strip of tape as shown.

2. Tape your string to your marker, then tape the other end to the table so that the marker JUST reaches the bottom of the page.

3. Holding the pen at the length of the string, draw an arc!

4. Cut along the arc!

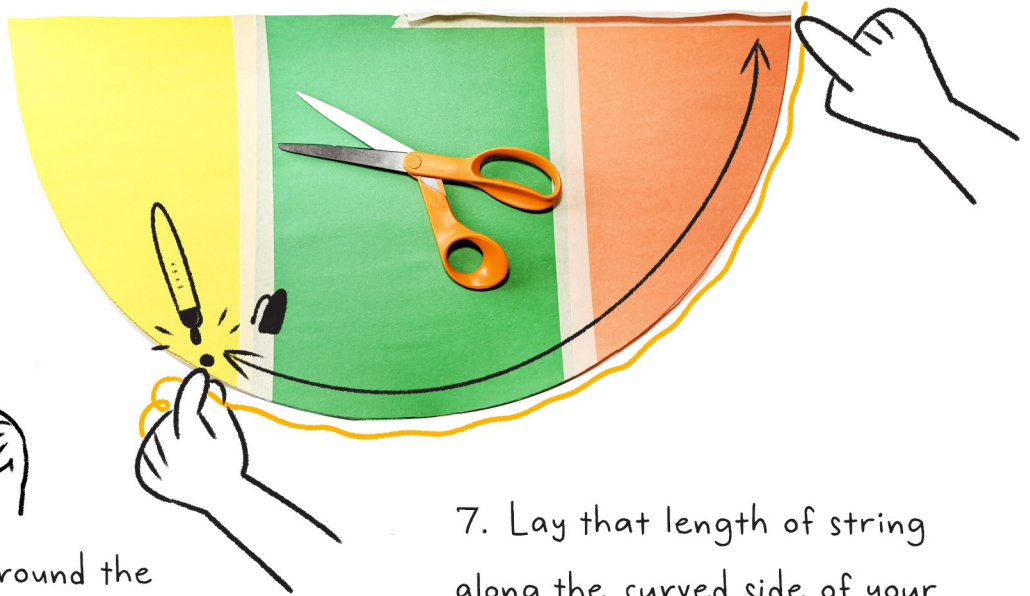

5. Apply a strip of tape from edge to center of the flat side. Overhang the edge of the paper with the tape, then fold the overhanging part towards you.

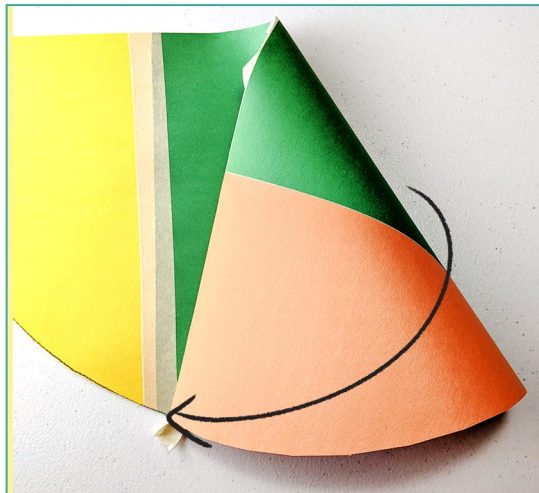

6. Use string to measure around the largest/fluffiest part of your head!

7. Lay that length of string along the curved side of your hat. Mark where it ends!

8. Wrap the point of the folded-tape edge over to meet the spot you marked on the curved edge! Then press the tape all the way up on the inside! (It might help to pinch the point of your cone together first!)

9. Add a tape donut to the corner of the remaining flap! Wrap the flap around your hat and press to secure! ENJOY YOUR HAT!
